DETAILED ACTION

Claims 41-48 have been canceled. Therefore, claims 1-40 are pending in this application. Claims 18-40 are withdrawn from further consideration by the Examiner, 37 C.F.R. § 1.142(b), as being drawn to a non-elected invention. The withdrawn subject matter is patentably distinct from the elected subject matter as it differs in structure and element and would require separate search considerations. In addition, a reference, which anticipates one group, would not render obvious the other.

Previous Objections

Claims 1-17, 41, 42 and 44 were objected to for containing non-elected subject matter. Applicants Amendment filed on January 16, 2007 have limited the claims to the elected subject matter. Therefore, the objections to said claims is hereby withdrawn. Applicants also canceled claims 41-48, rendering the objections to claims 41, 42 and 44 moot.

Since the compound claims were found allowable, in accordance with M.P.EP 821.04 and In re Ochiai, 71 F.3d 1565, 37 USPQ 1127 (Fed. Cir. 1995), product claims have been rejoined with process claims. Therefore, the restriction requirement between the product and method of use claims is hereby withdrawn.

Reasons for Allowance

The present invention is directed to compounds of Formula I, depicted in claim 1, wherein: X is CO₂R⁸, CONR⁵R⁶ the other variables are as defined. The closest prior

art is to Tang US 2006/0142284 A1. Tang teach compounds of Formula . The novel and nonobvious aspect of the claims is the substituent X. The prior art fails to teach or suggest the compounds as presented in this application.

Therefore, claims 1-40 are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement for Reasons for Allowance."
